

1. Brainstorming & Ideation Phase

ComicCraft - AI Comic Story Creator using Gemini Models

Phase Details

Project Idea	Create a web-based AI application that helps users create personalized comic stories and illustrations from their own ideas.
Problem Identified	Creating a complete comic normally requires separate skills for story writing, dialogue, illustration and page layout.
Proposed Idea	Use AI to generate a panel-by-panel storyline, narration, dialogue and comic-style illustrations from user-provided details.
User Inputs	Story prompt, main character name, setting, story tone and art style.
Expected Output	A personalized multi-panel comic that can be previewed on the web interface and exported as a PDF.
Main AI Idea	Gemini models are used for story generation, while Stable Diffusion is used for comic-style image generation.

Prepared as a separate phase document for the ComicCraft project.
