

4. Project Planning Phase

ComicCraft - AI Comic Story Creator using Gemini Models

Phase Details

Step 1 - Prepare Inputs	Design the form for story prompt, character, setting, tone and art style.
Step 2 - Plan AI Workflow	Send the user information to the backend and use the Gemini models to create the story structure and detailed content.
Step 3 - Plan Image Generation	Convert the panel image requirements into prompts and use Stable Diffusion to create the illustrations.
Step 4 - Plan Layout	Combine panel titles, images and narration using the layout builder.
Step 5 - Plan Export	Create a PDF containing the generated comic panels using the export module.
Step 6 - Plan User Flow	Input → Generate → Preview → Export → Success confirmation.

Prepared as a separate phase document for the ComicCraft project.
