

6. Project Testing Phase

ComicCraft - AI Comic Story Creator using Gemini Models

Phase Details

Input Testing	Check that the application accepts the required story prompt, character, setting, tone and art style.
Story Generation Testing	Test whether the AI produces a structured panel-by-panel story and appropriate narration/dialogue.
Image Testing	Check whether Stable Diffusion generates illustrations matching the requested comic style and panel prompts.
Integration Testing	Verify that frontend input reaches the FastAPI backend and that generated results return correctly to the preview page.
Layout Testing	Check that titles, images and narration are arranged correctly in the comic layout.
Export Testing	Verify that the completed comic can be exported successfully as a PDF and that the success page is shown.

Prepared as a separate phase document for the ComicCraft project.
