

7. Project Documentation Phase

ComicCraft - AI Comic Story Creator using Gemini Models

Phase Details

Project Description	ComicCraft is a web-based application that uses AI to generate personalized comic stories and illustrations from user prompts.
Technology Stack	Frontend: HTML, CSS and Jinja2. Backend: FastAPI. AI: Google Gemini APIs and Hugging Face Diffusers/Stable Diffusion.
Important Templates	index.html is used for input collection, comic_preview.html displays the generated comic, and export_success.html confirms successful export.
Backend Components	FastAPI manages server operations and routes; the AI workflow generates story content and illustrations; layout and export modules prepare the final comic.
AI Integration	Gemini Flash creates the structured outline, Gemini Pro creates detailed narration and dialogue, and Stable Diffusion generates illustrations.
Documentation Purpose	The documentation records the project idea, requirements, architecture, workflow, technologies, modules and expected user flow.

Prepared as a separate phase document for the ComicCraft project.
