

8. Project Demonstration Phase

ComicCraft - AI Comic Story Creator using Gemini Models

Phase Details

Step 1	Open the ComicCraft web interface.
Step 2	Enter a story prompt, main character name, setting, story tone and preferred art style.
Step 3	Submit the form so the FastAPI backend can process the request.
Step 4	Show how Gemini generates the comic outline, narration and dialogue.
Step 5	Show how Stable Diffusion generates the illustrations for the panels.
Step 6	Display the completed comic in the preview page.
Step 7	Use the layout and export process to create the final PDF.
Step 8	Show the export-success page and the downloaded comic PDF.

Prepared as a separate phase document for the ComicCraft project.
